The river steamer Vernon arrived yesterday from Vernon with 157 barrels of naval stores.

The river steamer Capt. Fritz arrived yesterday from Freeport with 82 barrels of naval stores.

Fishing By Telephone. Consul Louis Goldschmidt, of Nanes, France, makes the report that a use for the telephone in fishing has been invented in Norway. A microphone, the role of which consists in amplifying submarine sounds, is shut up in a thin, water-tight steel box and kept in constant communication by metallic wires with a telephone re-ceiver installed on the fishing boat. It is stated that with this apparatus the fisherman is informed of the approach of fish. Moreover, it is said that each kind of fish gives in the instrument a particular sound. Thus the arrival of herring is signalized by a sort of whistling; the codfish announces its_arrival in the neighborhood by a sort of grunting.

ABE DANIELS.

26 and 28 E. Garden St.

February 12 has been designated by the superintendent of public instruction as state health day. In schools throughout the state there of the body, fresh air, etc., read. Aldifferent diseases that are communicated one person from the other.

In view of the tuberculosis exhibition just closed in Jacksonville what this Catechism has to say about this disease is interesting. It is in the form of questions and answers:

What is another name for tubercuosis is asked. Answer, consumption. Can a person have turberculosis anywhere except in the lungs? He can have it anywhere. When it is in the lungs we call it consumption; in the BUILDING PERMITS ymphatic glands we call scrofula; when in the spinal column be call it Pott's disease; when in the skin, we call it lupus; when in the knee we call it white swelling; when in the hip we call it hip-joint disease; when in the brain covering we call it tubercular meningitis; when in the bones generally we call it tubercular feet, on East Cervantes street, near bones generally we call it tubercular feet, on East Cervantes street, near bender. caries; but wherever it is, it is due to a small vegetable organism or germ or microbe. Does turbefculosis kill many people? About one in every seven persons dies of tuberculosis.

Does it kill many people in Florida: It kills more than any other disease. It kills more people in Florida than yellow fever, malaria, typhoid, smallpox, diphtheria, measles, hydrophobia and lockjaw combined. Can it be prevented? Yes. Can it be cured? Yes. Why, then, does it kill so many

people? Because they do not know how to prevent it till they have already got it and then don't know how to cure it until it is too late. What should people know about tuberculosis? Everybody should know how it is acquired, how it may be prevented, and how it may be cured. What is a microbe? It is a little

can't be seen without a microscope. Does it grow? Yes, it grows, even as large plants grow. But it doesn't grow to be large. The way it grows is to make more like itself. Each germ grows and then divides and so on until there are millions of them. Where does it grow? It doesn't grow in the garden like beans, or in the field like corn, but it grows in people. What effect does it have on the per-to a diseased lung, and when they grow to be a large number the person gets sicker and sicker till he dies Getting a Start. Can it grow in healthy lungs? Not

very well. But after it gets started in sufficiently it keeps the lung diseased K so it can continue to grow. How does it get started? It starts when one is not very well. Has a cold, or measles, or scarlet fever, or gets over-tired or overworked, or loses too much sleep, or has too little food or food not well prepared. How does the germ get in? It can be breathed It is so little that it floats in the dust and may get in the nose or mouth and into the lungs that way Or it may be taken in food. How can it get in food? Cows have tuberculosis and then their milk has the germs in it. That is one way. When

Tuberculosis Exhibit Will Close in Jacksonville on Sunday Night.

Special to The Journal. Jacksonville, Feb. 9 .- With the closing of the Tuberculosis Exhibition at Jacksonville Sunday night, preparations will be made immediately for transferring the exhibits to Pensacola. In the meantime the director will make a tour of the East Coast, stopping at a group of enterprising cities ranging from Key West back up the coast and on to Tallahassee. In these cities, the Women's clubs and other organizations have co-operated towards holding one-day sessions with a series of public meetings and conferences of the people who want to help, and who want to better the living conditions of the state.

For COLDS and GRIP.
